May

Ashwin Nair

Ashwin is a dynamic researcher in the field of computer vision and AI. Ashwin has contributed to research at renowned institutions like CMU, UCA, IIT Bombay, and MBZUAI. His publications in top-tier conferences such as CVPR and the Indian Conference on Computer Vision highlights solutions to challenges in computer vision and AI.

17th
May

Pragya Balot

Pragya, a passionate researcher whose work bridges the worlds of solar physics and data science. Her research combines advanced time-series analysis—using tools like Python, SunPy, Fourier transforms—to uncover hidden patterns in solar activity. She also has hands-on experience through various internships and Integrated projects.
